

PROFESSIONAL AFFORDABLE CONNECTIONS

MODULAR ALUMINIUM PIPING SYSTEM

For Industrial Gases Liquids Vacuum and Inert Gases

Size Range : 20mm to 200mm

Materials : Aluminium alloy

Connections : Push fit

Temperature Range : Up to 200°C

Pressure Range : Up to 20 bar

INDEX

OUR FEW ESTEEMED CUSTOMERS

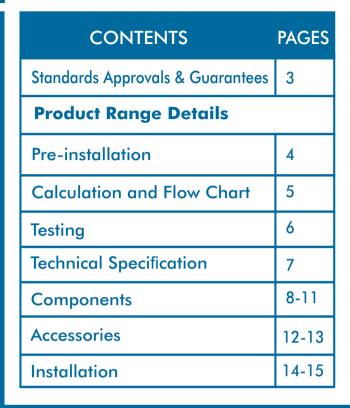

Givaudan

OUR FEW ESTEEMED CUSTOMERS

SBiocon

With a wealth of experience and the broadest range of solutions and the systems on the market, Canares Quickair™ products mean you'll complete your installation as seamlessly, efficiently and effectively as possible.

TOTAL FUNCTIONALITY, COMPLETE EFFICIENCY

Quickair[™] range of Products innovatively designed systems that reduce installation time and cost without compromising quality, aesthetics or reliability.

Our **Quickair**[™] product ranges are designed to perform faultlessly in a variety of applications and environments-so you can always be sure to connect with confidence whatever your challenge.

GLOBAL EXPERIENCE, COMBINED EXPERTISE

With over decade years of manufacturing and innovation combined with extensive industry knowledge and worldwide market experience, Canares offers the most advanced and complete modular Aluminium pipe system on a global scale.

As one India's largest and the most respected manufactures and suppliers of products for the plumbing, heating industries and gas piping.

Canares group is confident we can provide you with all the connection, control and support your project needs.

STANDARDS, APPROVALS AND GUARANTEES

It is Canares policy to provide a range of products and services which meets or exceed, the requirements of our customers in respect of quality, cost and delivery.

GUARANTEES

Our policy of continuously and rigorously testing Quickair[™] fittings means we are confident they will give you years of trouble free service. To demonstrate the total confidence we have in our products and our commitment to customer service, all Quickair[™] fittings are guaranteed against manufacturing defects for 10 years when installed in accordance with our instructions on specified tube materials and applications.

The Quickair[™] Range Meets The Following Standards Quickair[™] Fittings

All Quickair $^{\text{TM}}$ general range fittings are comply with the requirements.

ASME B31.1 Part1 specification for the Aluminium fittings and Aluminium pipes. Specification for tubes and fittings where pressure tight joints are not made on the threads (Metric Dimension).

QUALITY

Quality is of paramount importance to Canares group. Our products confirm to current Indian and Europe standards where applicable and also meet our own rigorous internal quality approvals. Canares group operates a quality management System for the development, manufacture and supply of fittings, tube, valves and accessories which complies with the requirements of ISO 9001:2015.

MARKINGS UNIVERSAL MARKING

All Quickair[™] fittings carry the marking of manufacturing batch

Where pipelines are constructed exclusively using Quickair[™] fittings and recommended tubes, the resulting Installation will be deemed Quickair[™] Systems and such qualify for a 10 year guarantee against all manufacturing Defects.

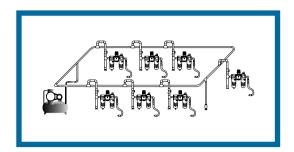

PRE-INSTALLATION

Proper line sizing for an airline network

- 1. Identify type of network: closed loop or dead-end
- 2. Calculate total length of line (feet)
- 3. Determine total flow required

TOTAL LENGTH OF NETWORK

| Flow Rate | | Length | | | | | | | | | | |
|------------|------------|--------|-----------|-----------|-----------|-----------|------------|------------|------------|------------|------------|------------|
| FI | Flow Rate | | 164 ft | 328 ft | 429 ft | 984 ft | 1640 ft | 2460 ft | 3280 ft | 4265 ft | 5249 ft | 6561 ft |
| Nm³/ Hr | NI/ min | cfm | 50 m | 100 m | 150 m | 300 m | 500 m | 750 m | 1000 m | 1300 m | 1600 m | 2000 m |

- ➤ Calculations based on total maximum pressure drop (△P) of not more than 3 PSIG for entire network, at 100 PSIG @ 15.6 °C
- Total flow required takes account of all flows for all compressed air powered tools and equipment
- Note that a typical compressor will produce approximately 4 SCFM per HP

TOTAL FLOW REQUIRED

WARNING

CALCULATION AND FLOW CHART

QUICKAIR™ FLOW CHART

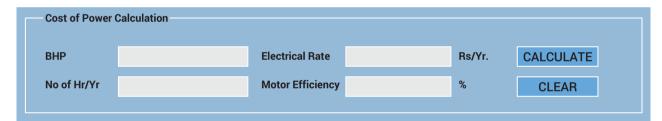

The Quickair[™] flow calculator helps you to choose the most suitable diameter for your installation. Enter the flow of your compressor, the system pressure rating and the total equivalent length of the system and add the components like valves, elbow, tee and reducers.

Example:

Flow rate:850 cfm at 109 psi
Total area 1788 feet
The recommended **Quickair**[™] diameter is
80mm size
(pressure drop of 145 psi=less then 5%)

| PRESSURE DR | OP COMPONENTS | PRESSURE DROP ON STRAIGHT LINE Pressure Drop | | |
|--------------|------------------|----------------------------------------------|--|--|
| . | No of Ball Valve | | | |
| Ball Valve | | Pipe Length. L mtrs | | |
| | No of Elbows | Pipe Dia. D mm | | |
| Elbows | | Free Air Flow Rate *cfm | | |
| £ | No of Equal tee | Pipeline Pressure bar | | |
| Equal tee | No of Reducers | | | |
| Reducers | TOTAL = | TOTAL = | | |
| CALCULATE | CLEAR | CALCULATE | | |
| TOTAL PRESSU | JRE DROP | GRAND TOTAL | | |

COST OF POWER CALCULATION

From above you can calculate cost of power for producing the compressed air. Visit: www.canares.com for live calculation.

QUICKAIR[™] PIPELINE SYSTEMS

The **Quickair**[™] pipe line system has been designed and built for installation of compressed air and inert gas distribution system.

The materials and types of fittings used offer a flexible system that can be integrated with all **Quickair**[™] Systems and solve all the problems and meet all the requirements of even the most complex systems. Innovative technology at the heart of **Quickair**[™] enables rapid and easy assembly, quick connection of components to the Aluminium pipes.

QUICKAIR™ IS PROFITABLE AND EFFICIENT ALTERNATIVE

Quickair[™] offers a cost effective, innovative and energy efficient aluminium compressed air piping system that is very easy to assemble, Change and expand. Furthermore, labour accounts for only 20% of the cost of installing Quickair[™]. By comparison, labour accounts for 60%-80% of steel system and 50%-70% of a copper system.

Quickair[™] OFFERS Lower installation cost Push-Fit concept No corrosion Powder Coated 20mm-200mm dia pipe sizes Modular design Re-usable fittings

Easy to install

TESTING

Quickair[™] PIPING PRECAUTIONS AND TESTING

Care should be taken to protect pipes against mechanical shocks especially when close to the passage of fork-lift trucks where suspended objects are being moved. Quickair™ pipes must not be bent or welded.

Quickair[™] RANGE

Traditional compressed air piping materials with their advantages and disadvantages.

| Materials | Advantages | Disadvantages |
|----------------------------|---------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Black Iron (Mild steel) | Moderate material costs Readily available in multiple sizes | Labor intensive installation, May rust and leak rough inside promotes contaminant build up and creates pressure drop |
| Galvanized Iron | Moderate materials costs Readily available in Some multiple sizes rust protection. | Often only exterior is coated. Labor intensive installation, Rough inside promotes contaminant build up and creates pressure drop, May rust at build up and creates pressure drop, May rust at joints and leak |
| Copper | No rust, good air quality smooth interior-low pressure drop | Requires quality brazing to prevent leaks, Susceptible to thermal cycling installation involves open flame |
| Stainless Steel | No rust, good air quality Smooth interior-low pressure drop | labor intensive installation, Expensive materials |

TESTING

After installing the Quickair™ system, the system should be tested for 1.5 times of the working pressure for the period of 8 hours and once line Is gradually pressurized all the joints should be tested for any leakage by applying the soap water or laser tester. If any leakage found to be rectified after 8 hours pressure leakages drop should be observed and ensured that within the permissible limit.

The Quickair[™] pipe line includes all the accessories you need for a top quality installation:

- · Straight unions
- · Elbows and tees
- Equal cross
- Reducing fittings
- Integrated loop drop
- Ball valves
- Quick assembly brackets and hangers
- Pipe clips
- Expansion and flex hoses
- FRL
- QRC

WHERE AS Quickair[™] OFFERS FEATURES INCLUDES

Installs faster than other common piping
No specialized techniques needed
No threading, welding, or brazing pipe
No special tools are needed
Can connect to existing systems with
other pipe types
Easy to add on to or disassemble for
your changing needs

OPTIMUM FLOW, HIGHEST AIR QUALITY AND LOW MAINTENANCE

Quickair[™] smooth calibrated aluminium construction has a low friction coefficient, providing the best possible laminar flow. Full bore fittings further minimize pressure drop for optimum flow and energy efficiency. Leak free connectors prevent air loss and wasted energy. Quickair[™] is ideal for installations requiring the highest quality air. Aluminium material will not rust or corrode. Further, it has no rough surfaces or interior restrictions that accumulate contaminants. The smooth interior with full bore design allows them to flow to your dryers and filters for efficient removal.

TECHNICAL SPECIFICATION

WIDE SCOPE OF SUPPLY

Quickair[™] has a complete scope of supply including piping in ten standard sizes to accommodate nearly any flow requirement, all the way down to the point of use.

Size:

20mm, 25mm, 32mm, 40mm, 50mm, 63mm, 3", 4", 6", 8"

ADVANTAGES OF Quickair™ FITTINGS

Quick connections
Full bore design
Interchangeable and reusable
Non-flammable materials(UL94HB Certified)

TECHNICAL SPECIFICATION Quickair™ Piping System

| Application | Compressed air, vacuum, nitrogen, Argon (other fluids & gases please contact Us) | |
|-----------------|----------------------------------------------------------------------------------|--|
| Pressure | Max 20 bar | |
| Vacuum | 29.32'' hg | |
| Temperature | -20° C to 200 C° | |
| Design Standard | ASME B 31.1 | |

Materials of Construction of Aluminium pipe

| Alloy | Aluminium Alloy 6060 T5 | |
|----------------|-----------------------------------------|--|
| Tolerance | Tolerance Std. IS2763, IS3965, EN-755-2 | |
| Color | Blue coated (RAL 5012) | |
| Surface finish | 60 microns | |

FITTINGS

Quickair[™] Fittings provides versatility of design and helps to overcome constraints often encountered with structure of industrial buildings

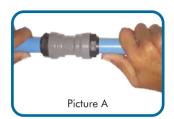

Quick Connections
Full bore design
Interchangeable and reusable
Non-flammable materials (UL94HB)
Maximum working pressure: 20 bar
Vacuum: 29.32" hg
Normal working temperature: -20° C to 80° C
(option upto 200° c)

Application:

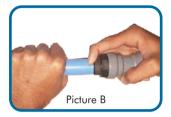

Compressed air, nitrogen, Vacuum, Co₂ for any other application Please contact.

Note: All products are 100% Tested

Simply push-fit Concept

Quickair[™] metal fitting is similar to one touch pneumatic push fitting concept. The advantage of this "Push-Fit" concept over other is modular piping systems. As there is nothing to tighten but only "simply push" the tube inside the fitting as shown in Picture A (up to 63mm)

While removing the tube from the fitting just need to push "removing clip" on the tube and press towards the fitting removing clip will disengage the grab-ring and will release the tube from the fitting.

Integral condensate retention design for superior flow without pressure drops.

Chemical Composition of Aluminium Tubes

| Alloy | 6060 | |
|--------|-----------|--|
| Al | Rest | |
| Mg | 0.35~0.6 | |
| Si | 0.35~0.6 | |
| Fe | 0.3 | |
| Mn | 0.1 | |
| Zn | 0.1 | |
| Cu | 0.1 | |
| Impure | 0.05~0.15 | |

Material of Construction of Fittings

| Size | 20– 63mm | |

INSTALLATION

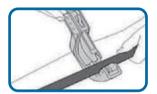

Before Installing Quickair[™] system a responsible person should check the area of installation Confirm to regulation designed to prevent the risk of explosion. Quickair[™] must be installed either After the receiver or after the dryer. Flexible hose should be fitted at the beginning of the piping system. In order to counter the vibration found in any compressed air piping system. When maintaining or modifying the Quickair[™] piping system the work must be undertaken only after the compressed air system has been vented. The installer must use only Quickair[™] components and accessories. The installer also ensure that the installation as been properly carried out in-line with the instruction and that it meets all legal requirements.

d-Distance between fitting and clip
Dmax-Distance between two clips(2 mtr)

FIXING THE TUBE

Step 1: Cutting the Tubes

Step 2: Chamfering the Tubes

Step 3: Inserting the tubes Info fitting

Step 3: Inserting the Tubes info fitting

FIXING THE DROP

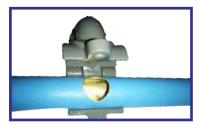

Step 1: Positioning the Droplet on the tube

Step 4: Chamfering the hole

Step 2: Marking the position Of the hole on tube

Step 5: Allgning the Droplet to the hole

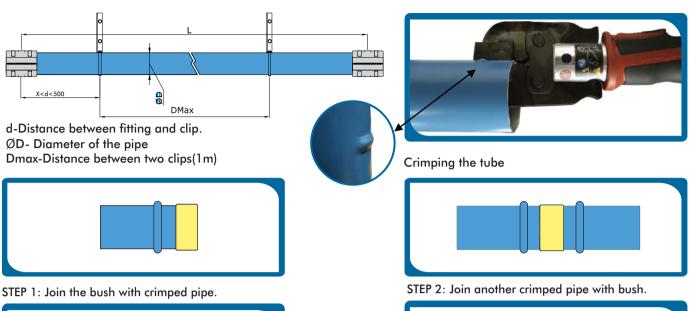

Step 3: Drilling the Required Hole on the tube

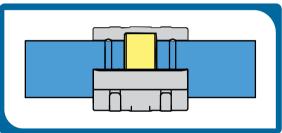

Step 6: Fixing the Droplet on the tube

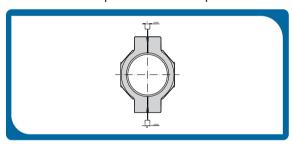

INSTALLATION

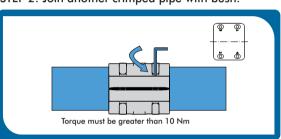

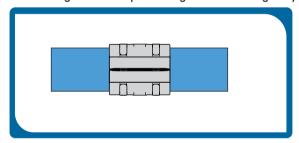

STEP 3: Join the top and bottom clamp with the bush.

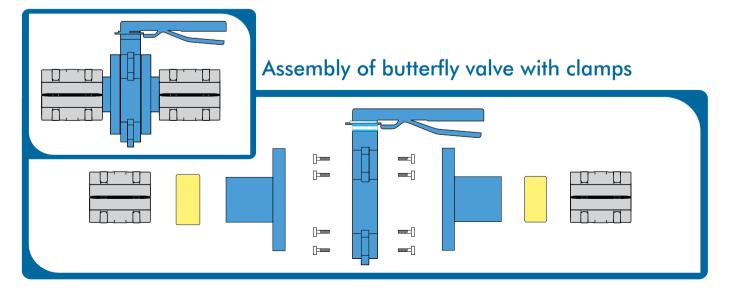

STEP 5: While tightening maintain 1mm gap between top and bottom clamp.

STEP 4: Tight the clamp with align bolts and align key.

STEP 6: After tightening pass the air and check the leakage with soap water.
